
FRICTION WELD – BATTERY POWERED - CHT - 300

HIGH TENSION – 3,300N
POLYESTER / POLYPROPYLENE
FRICTION WELD
SINGLE-HANDED OPERATION

CHT 300

The CHT 300 is a high tension battery powered friction weld tool (3,300N), featuring touch panel adjustment controls with LED display. A lightweight, well balanced, low maintenance tool, with a one hand operation.

DATA

Type of seal	Friction weld
Tension	3,300 newton (330 kg)
Weight	approx. 4.2 kg (with battery)
Method of insertion	strap on strap

STRAPS

Polypropylene and Polyester straps	
Strap widths	16 and 19mm
Strap thicknesses	Polypropylene 0.8 – 1mm Polyester 0.8 – 1.3mm

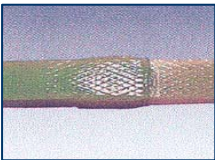

BATTERY & CHARGER

BOSCH 14.4V HD

Charging time	approx. 60-75 mins (including previous discharging)
Sealing cycles	approx. 120-250 PP 80-150 PET (depending on strap tension)
Voltage	100-240V
Mode of operation	Discharge / Charge

FRICITION WELD

The CHT 300 seals the strap with a friction weld. This is achieved by pads that create heat by vibration which welds the straps together. This is a much more efficient seal than the metal seal.
